

CHOOSE MOI

Safety training your crew will actually enjoy

Interactive board-game health & safety training for real workplaces

CHOOSE MOI turns mandatory health & safety training into a board game your team actually finishes. Built from 13 years working in facilities management, it gets every worker playing, learning and remembering — no classrooms, no boring slides, no company email needed.

How it works

- Workers sign in with a simple worker ID and PIN — no email addresses needed.
- They roll the dice, move around the board and answer real safety questions.
- Land on every tile to earn a certificate — proof of training you can keep on file.
- Play on any phone, tablet or computer — or on the break-room TV with live scores.

Speaks your worker's language — automatically

- The game reads each player's phone language and translates itself automatically.
- Questions, answers, subtitles and character voices all switch on their own.
- English, Polish and Romanian are hand-checked; dozens more languages translate on the fly.
- No setup, no language packs to buy — it just works for international crews.

Seven boards, built for real workplaces

- Facilities Management: General, Cleaning crew, Office staff and Security packs.
- Road Safety: General, Professional drivers and Haulage / HGV packs.
- Construction Site HSE and Care & Support boards.
- Adaptable to any industry with health & safety duties — hospitality, warehousing, retail and more — and question packs can be tailored to any country's regulations or replaced with your own content.

Your company cares — arrive home safely.

Every board, every question and every certificate is built around one promise: that everyone who leaves for work in the morning makes it home safely every day. CHOOSE MOI makes that promise something your crew plays, not just reads.

Deadly serious about safety. Seriously fun to play.

For managers and companies

Proof of training, without the paperwork

- A company portal with live reports, certificates and branded exports.
- See who has trained, who passed, and who needs another go.
- Scores, CPD minutes and printable certificates for every worker.
- Printable QR posters get each crew playing in seconds — scan, sign in, play.
- Every company gets its own private, branded link — your data stays separate from everyone else's.

Demo-first, always

- Boards are never open to the public — access is by demo request only.
- You request a demo, we set up your company, and you control who plays.
- Try the full game on your own phone before you commit to anything.

Why it works

- Short UK safety videos from HSE, THINK! and RoSPA make learning visual and evidence-based.
- Character voices read questions aloud, with an adjustable kid-voice setting.
- Works offline once loaded — perfect for sites with poor signal.
- No app to install: it runs in the browser your workers already have.

Request your demo today

Scan one QR code and walk a full board on your own phone —
in your own language — before you decide anything.
